SCALE FOR PROJECT RAINFALL (/PROJECTS/42CURSUS-RAINFALL)

You should evaluate 1 student in this team

★

Git repository

```
git@vogsphere-v2.1337.ma:vogsphere/intra-uuid-35fd451b-0a04
```

Introduction

For the smooth running of this evaluation, please respect the following rules:

- Remain polite, kind, respectful and constructive whatever happens during this conversation. It's a matter of confidence between you and the 42 community.

- Highlight the potential problems you 've had with the work you're presented to the person or the group you're grading, and take the time to talk about and discuss those issues.

- Accept the fact that the exam subject or required functions might lead to different interpretations. Listen to your discussion partner's perspective with an open mind (are they right or wrong ?) and grade them as fairly as possible.
42's teaching methods can make sense only if peer-evaluation is taken seriously.

Guidelines

- You must only evaluate what you will find in the student's or group's GiT repository.

- Take the time to check that the GiT repository matches the student or group and the project.

- Double check that no malicious alias was used to mislead you and make you

grade something different from the official repository content.

- If a script supposed to help evaluate the exam is supplied by either side, the other side will have to strictly check it to avoid nasty surprises.

- If the evaluating student has not yet taken this project, they will have to read the exam subject in its entirety before starting the evaluation.

- Use the flags available on this grading system to signal an empty or non-funcional project, a norm flaw, cheating, etc. In that case, evaluation stops and final grade is 0 (or -42 if it's a cheating problem). However, if it's not a cheating problem, you are invited to keep talking about the work that has been done (or not done, as a matter of fact) in order to identify the issues that lead to this stalemate and avoid it next time.

level9

Detailed explanation of the technique used to solve the test. The
source file must perfectly explain the behaviour of the real binary
included in this test level.

Yes   No

Rain-Fall bonus

Bonus will be taken into account only if the mandatory part is PERFECT. PERFECT meaning it is completed, that its behavior cannot be faulted, even because of the slightest mistake, improper use, etc... Practically, it means that if the mandatory part is not validated, none of the bonus will be taken in consideration.

bonus0

Detailed explanation of the technique used to solve the test. The
source file must perfectly explain the behaviour of the real binary
included in this test level.

Yes   No

---

bonus1

Detailed explanation of the technique used to solve the test. The
source file must perfectly explain the behaviour of the real binary
included in this test level.

Yes   No

---

bonus2

Detailed explanation of the technique used to solve the test.
The source file perfectly explains the behavior of the real binary
present in the test level. Explaining the issue tied to the metacharacter(s).

Yes   No

---

bonus3

Detailed explanation of the technique used to solve the test. The
source file must perfectly explain the behaviour of the real binary
included in this test level.

☑ Yes   ✕ No

Ratings

Don't forget to check the flag corresponding to the defense

✔ Ok   ★ Outstanding project

▌ Empty work   ▲ Incomplete work   ❗ No author file   ☠ Invalid compilation   🗊 Norme

🖻 Cheat   ♟ Crash   👤 Incomplete group   ⊘ Forbidden function

Conclusion
